How do schools register?
†A school will only receive epinephrine auto-injectors in accordance with all applicable laws. The school must submit a formal written request (letter, email, phone call, etc.) to the EpiPen4Schools team, explaining why the school needs epinephrine auto-injectors and how it will ensure safe administration. The school must comply with any and all requirements outlined by the school district. EpiPen4Schools reserves the right to determine which schools are eligible to participate in the program.

EpiPen4Schools® is an exploratory, cross-sectional, web-based survey of more than 12,000 schools to evaluate the characteristics of anaphylactic events and epinephrine auto-injector use in U.S. schools participating in EpiPenSchools during the 2014-2015 school year. Results showed:

- An estimated 1 out of 13 children in the U.S. has a food allergy.
- An estimated 1 out of 100 children in the U.S. has a drug allergy.
- An estimated 1 out of 5 children in the U.S. has a new or unknown allergy.
- An estimated 1 out of 3 children in the U.S. is at risk for life-threatening allergic reactions due to allergic sensitivities.
- MILLION PEOPLE have participated nationwide
- 73,000+ schools have participated nationwide
- >90,000 schools have registered nationwide
- 25% of the life-threatening allergic reactions treated at schools were treated with an epinephrine auto-injector provided by the EpiPen4Schools® program.
- There were a total of 87,000+ events recorded at schools* during the 2014-2015 school year.
- In those events when an epinephrine auto-injector was used, half of the patients had a previous anaphylactic reaction.
- In those events when epinephrine auto-injector was not used, 20% of the patients had a previous anaphylactic reaction.
- In those events when epinephrine auto-injector was not used, 30% of the patients had a previous anaphylactic reaction.

Indications
Use EpiPen® or EpiPen Jr® for the emergency treatment of life-threatening allergic reactions due to allergic sensitivities. EpiPen® and EpiPen Jr® are intended for immediate medical help right away. You may need further medical attention. Only a health care professional can give you a dose via injection. If you are not sure whether you need further medical attention, call 911 or your primary care provider. Call your doctor if symptoms continue or get worse. Call 911 or your doctor if you think you are experiencing other side effects when you use EpiPen® or EpiPen Jr®.
